

Switched On To Flexible Learning.

ProofPositive is Mediacorp Online Ltd's e-portfolio system for delivering and managing competence-based qualifications over the internet, be they NVQ's, SVQ's, or custom, in-house qualifications.

The portfolios are virtual - a collection of evidence files, assessment and verification data held on a central server, and can be accessed simultaneously by anyone who is a stakeholder (administrator, verifier, assessor, or candidate) for that portfolio. This eliminates the logistical problem, whereby a paper portfolio can only be in one location at one time, although multiple stakeholders, distributed across different locations, require simultaneous access. Thus – no more need to drag bulky, heavy physical portfolios around the country.

ProofPositive sends out automatic e-mails when 'significant events' occur (i.e. it emails the assessor when the candidate uploads a piece of evidence; it emails the candidate when the assessor has assessed the evidence, etc), so that the 'baton' is handed over to the appropriate user immediately, ensuring that the whole delivery process runs smoothly.

Key Benefits

Profitability

Increased assessor productivity

Reduced overheads – fewer Assessor visits

Ownership And Control

The program is completely 'brand-able' - your logo, colours and styles on all pages

All portfolio stakeholders (assessor, verifier, candidate, administrator, etc) can access the portfolio simultaneously, regardless of geographical location

Increased perception of portfolio ownership by candidates, leading to higher candidate retention rates

Progress bars provide clear, visual incentives for candidates, leading to quicker portfolio-completion rates

Author your own multiple-choice self-tests for any unit or qualification

Upload your own supporting materials for any unit or qualification.

Flexibility

Users can have multiple user roles (a user can be a candidate in one qualification, an assessor in another, and a verifier in another)

Candidates can be registered for multiple portfolios.

A portfolio can have a different assessor and different verifier for each unit

Evidence files can be re-used across multiple claims

“ The college has been using Proof-Positive since 2005, and we are now delivering some 15 vocational qualifications via the program, which is powerful, but intuitive and easy-to-use, unlike many other e-portfolio systems.
Brian Wilson,
Assistant Principal,
West Lothian College ”
