

Deliver and track your e-learning content with ease.

Studyit Online is a user-friendly, web-based learning management system that gives you the power to easily publish, track and deliver all of your e-learning content.

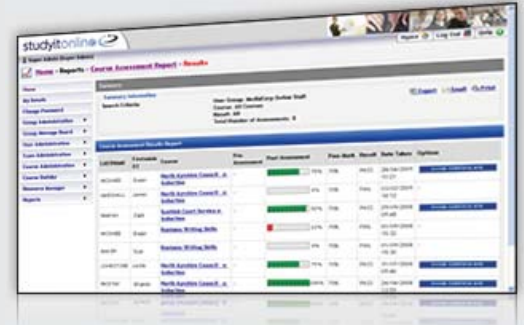

The system removes the frustrating and unnecessary complexity often associated with expensive corporate learning management systems. The system can be hosted in-house or via our cost-effective hosting option which ensures all your data is secure and backed-up daily.

Our clear and concise reports give you access to the data you require for compliance or management reports.

“ We commissioned use of StudyIT online to deliver CPD training and full exams. This system is working extremely well for us, especially as we expand our portfolio of CPD titles.

Andrew Spencer
Head of Software & Systems Development
National Energy Services Ltd

”

Features and Benefits:

Cost savings - Reducing face-to-face training can help save your organisation time and money.

Hosted - Removes both initial and on-going costs for computer hardware or dedicated in-house support staff. We maintain and support the solution for you, affording you priority access to new features and excellent support should a problem arise.

User Friendly - Uncluttered, easily-navigable user interface which is cross-browser compatible.

Tracking - Report on SCORM and non compliant e-learning content.

Clear, concise reporting - Easy-to-understand reports for both learner and administrator. Reports can be printed, emailed to a chosen email address or exported to MS Excel.

Fully customisable - Add your own branding, integrate with existing HR systems or add your own custom reports.

Highly scalable - Support a large number of learners.

Integrated assessment / evaluation author - Assessment author allows administrators to publish pre- and post-course assessments and evaluations. Each assessment attempt, including all learner responses, is stored in the system for reporting and review.

Supports multiple learner groups

Multi-level administrator access.
